Github

After 6 years of experience in the CMS industry. With a high level of experience with HTML and CSS, as well as a deep knowledge of the UX/UI principles, and strong design skills. I recently expanded my front-end tool box, by acquiring a firm knowledge and experience with JavaScript and React JS.

I am now looking for my next challenge, a long-term job, in which I can express my wide range of abilities. I am eager to develop my professional skills as well as acquiring new proficiencies. I am open for both front-end and product management positions.

WORK EXPERIENCE

2017-2022: Interdeal development

Head of community centers department • Build and designed websites with CMS platforms • Managed projects • Coordinated between costumer needs and the company's technical solutions • Used HTML, CSS • Used JavaScript • Implemented jQuery codes • Committed responsive adjustments to websites • Managed e-commerce websites • Used high design skills • Gave excellent technical support and guidance to customers.
